

Multi-Disciplinary International Conference
On
GLOBAL CHALLENGES FOR SUSTAINABLE DEVELOPMENT
on 10th and 11th January 2020
Organized By
Deshbhakta Ratnapanna Kumbhar College of Commerce Kolhapur,
In Association With
The United Western Banks Late R.N. Godbole Chair
Department of Commerce and Management, Shivaji University, Kolhapur.

CONCEPT NOTE

Sustainable development means development to preserve the natural resources in the process by protecting the interest of present generation for future. At present the quest for development across the globe has resulted into excessive exploitation of natural resources which are on the verge of depletion. Present approach of development is emanating the environmental threat by way of global warming, erratic rainfall, flood, drought across the globe. Developing countries from Asia, Africa continent have become more vulnerable to the various challenges such as poverty and exclusion, unemployment, climate change, migration, conflict and humanitarian aid, building peaceful inclusive societies, supporting the rule of law. The developed countries also feeling the heat of environmental degradation in the form of cyclonic disaster, strong heat wave, migration from developing and backward areas and inferno. The nature of challenges varies as per continent and more disadvantageous to developing and backward countries compared to the developed. In this regard, Government, business and society have to play vital role to face the challenges for sustainable development.

The main concern of sustainable development is to conserve natural resources for future generations. To protect and save our resources and to utilise it in future is the thrust area of the sustainable development. In this context various measures are being undertaken at the national as well as global level. At World scenario there is Kyoto Protocol where member countries discussed and fixed norms for diffusion of CFC. Sustainable Development Goals (SDG) officially adopted by 193 countries at the sustainable development Summit held in 25th to 27th Sept 2015 in New York where new agenda officially adopted “Transforming our world : the 2030 Agenda for sustainable development” which was agreed upon by the 193 member states of the United Nations and includes 17 Sustainable Developmental Goals (SDG). It is a road map to ending global poverty, building a life of dignity for all. Now corporate performance is being measured in the principles of “Triple Bottom Line” with considering dimensions like 3Ps– People, Profit and Planet. All academic disciplines are taking into account the ecological considerations; hence sustainable development is burning issue to be thought.

The conference aims to put light on various issues causing challenges to Sustainable Development through providing a platform to various galaxy of intellectuals such as academicians, corporate, practioner’s, policy makers, government agencies, NGOs., Civil society and other groups. Entire event

will focus on core issues which will be helpful to policy framers across globe. With this perspective, deliberations can be made in research gathering like conference.
