Scope of the Seminar :

The National Seminar on "AI: A Multidisciplinary Approach to Innovation and Transformation" aims to explore the transformative role of Artificial Intelligence across various domains, fostering interdisciplinary discussions on its impact, challenges, and future prospects. The seminar will cover AI advancements in science, technology, business, healthcare, education, law, media, and sustainable development. It will highlight innovations in AI-driven automation, decision-making, ethical governance, and human-AI collaboration. The Artificial Intelligence (AI) is no longer a futuristic concept- it is an essential tool for modern education. The traditional one-size-fits-all approach to learning is becoming less effective, and AI provides innovative solutions to make education more personalized, efficient, and accessible. The conference will serve as a platform for knowledge exchange, fostering interdisciplinary collaborations to harness AI's potential for innovation and societal progress.

Objectives of the Seminar :

- To emphasis the significance of AI in growing economy.
- To provide platform to discuss on opportunities in AI in various fields.
- To explore various issues related to AI.
- To focus on specific topics such as AI as a tool for effective teaching learning process.
- To bring together policy makers, academics, researchers, industrialists to identify solutions to AI related issues.
